

As the Fit Spec Technician, you will be responsible for, measuring, fitting, making comments and following up with the vendors. You will also verify grading, workmanship and all details to ensure sample meets requirements.

Some of what you'll do

- Assisting preparation of initial specs for each style using established blocks
- Comparing the garment sample to the specs, sketch and tech pack created by the design team/fit manager
- Correcting fit issues and communicating changes to the overseas makers using Excel and Illustrator
- Verifying samples before fitting and correct garment after fitting
- Maintaining accurate product size and fit specifications in the finished garment
- Follow up and proceed with any changes related to Fit & spec in the tech packs
- Advise production/design of major changes/issues in the Fit & Spec of garment

Some of what you need

- Minimum 5 years' experience in fits
- Experience working with outerwear a must
- Understanding of outerwear construction
- Knowledge of Adobe Suite and Excel
- Momentis an asset
